

Viewing of the Shots Fired on Campus Video

Acknowledgements: *The Center for Personal Protection and Safety, www.cppssite.com/
University Police Department, www.police.louisiana.edu*

There is a real potential for violence on any campus. Many initiatives have been taken to make this campus very safe from violence. You can do your part by educating yourself regarding this, and being prepared to act if you are faced with a violent situation.

University Police have made available a series of videos designed to give employees some useful information about dealing with potential violent situations on campus. For this quarter, every employee is expected to view the video entitled "*Shots Fired on Campus*". To do this, log onto the following website:

<http://police.louisiana.edu/videos/index.shtml>

You must enter your CLID and password to view the video. Once you have done this, just click on the "Shots Fired on Campus" link and view the video. There are other videos at this link that are very helpful, feel free to view these as well for additional information.

I want to encourage departments to view this video as a group when possible. Also, for employees that do not have convenient access to the internet, several copies of the DVD are available for checkout at Dupre' Library at the Circulation Desk. Note that these DVDs will likely not work on a DVD player attached to a television.
